

PolicyWise CyberSafe Individual - Sample Cyber Insurance Policy

Document Code: PW-CY-2026-01

Synthetic-data notice: This fictional document is for RAG development, testing, demonstrations, and training only. It is not a real insurance contract.

1. Purpose

CyberSafe provides selected personal cyber-risk benefits for the insured individual. It is not a business cyber-liability policy.

2. Online Fraud

Direct financial loss from an eligible phishing or account-takeover incident is covered up to INR 1,00,000, subject to timely reporting and policy conditions.

3. Identity Theft

Reasonable costs associated with restoring identity records after a covered identity-theft event are covered up to INR 50,000.

4. Cyber Extortion Support

Professional incident-response consultation for a covered cyber-extortion event is available up to INR 75,000. Payment of an extortion demand itself is not automatically covered.

5. Device Restoration

Reasonable data restoration services following a covered malware event are reimbursable up to INR 25,000. Hardware replacement is not included unless separately stated.

6. Reporting Requirement

The insured should notify the insurer within 48 hours after becoming aware of a potentially covered cyber incident and should promptly notify the relevant bank or service provider when financial accounts are involved.

7. Security Duties

The insured must take reasonable security precautions, including protecting authentication credentials and cooperating with account-blocking or recovery procedures.

8. Exclusions

Loss caused by intentional participation in fraud, speculative investment loss, cryptocurrency price movement, and voluntary transfer made after knowingly ignoring a confirmed fraud warning are excluded.

9. Testing Note

The 48-hour notification requirement is intentionally specific to this cyber policy.
