

PolicyWise FamilyCare Floater - Sample Health Policy

Document Code: PW-HF-2026-02

Synthetic-data notice: This fictional document is for RAG development, testing, demonstrations, and training only. It is not a real insurance contract.

1. Coverage Structure

The family floater provides a shared sum insured of INR 10,00,000 for two adults and up to two dependent children. Any covered family member may use the available shared balance during the policy year.

The policy is separate from the SecureHealth individual policy and its limits should not be mixed with that product.

2. Waiting Periods

A 30-day initial waiting period applies to illnesses. Accident-related hospitalization is not subject to the initial waiting period.

Pre-existing diseases have a 36-month waiting period and listed procedures have a 24-month waiting period.

3. Room Rent

Standard room rent is covered up to INR 7,500 per day. ICU charges are covered up to INR 15,000 per day.

4. Restore Benefit

After the base sum insured is exhausted by admissible claims, one automatic restoration of up to INR 10,00,000 is available for a subsequent unrelated hospitalization during the same policy year.

The restored amount cannot be used for the same illness or injury that exhausted the original sum insured.

5. Newborn Cover

A newborn child may be covered from day 91 after birth if the required endorsement is completed and applicable premium is paid. Routine maternity expenses remain excluded under the base plan.

6. Claim Documents

Reimbursement claims generally require the claim form, discharge summary, final bill, receipts, prescriptions, diagnostic reports, and identity details.

7. Exclusions

Routine dental treatment, cosmetic treatment without medical necessity, intentional self-injury, and experimental treatment are excluded unless a specific benefit states otherwise.

8. Renewal

The sample policy is renewable annually subject to applicable terms. Renewal does not reset completed waiting-period credit when continuity is maintained.

9. Testing Note

Questions mentioning FamilyCare or shared family coverage should retrieve this document rather than the individual SecureHealth policy.
