

PolicyWise DriveGuard Comprehensive - Sample Motor Insurance Policy

Document Code: PW-MT-2026-01

Important: This is a fictional, synthetic document created only for software development, RAG testing, demonstrations, and training. It is not a real insurance contract.

1. Policy Overview

DriveGuard Comprehensive provides own-damage protection for the insured private car together with third-party liability coverage, subject to the terms of this sample policy.

The insured vehicle must be used for permitted private purposes and operated by a person holding a valid driving licence.

2. Own Damage Coverage

Covered events include accidental collision, fire, lightning, explosion, theft, malicious damage, flood, cyclone, and landslide, subject to exclusions and deductibles.

The policy may pay the reasonable repair cost or the insured declared value where the vehicle is treated as a total loss, subject to claim assessment.

3. Theft

Vehicle theft is covered when the policy is active and policy conditions are satisfied. The insured should immediately report theft to the police and notify the insurer without unnecessary delay.

The original keys and relevant vehicle documents may be requested during claim assessment.

4. Third-Party Liability

The policy includes liability protection for covered legal liability arising from bodily injury, death, or property damage caused to a third party by use of the insured vehicle, in accordance with applicable terms and law.

5. Deductible

A compulsory deductible of INR 2,000 applies to each own-damage claim under this sample policy. Any voluntary deductible selected by the policyholder is applied in addition to the compulsory deductible.

6. Exclusions

Loss occurring while the vehicle is driven by a person without a valid driving licence is excluded, subject to applicable law and policy wording.

Mechanical or electrical breakdown without an insured external event, normal wear and tear, depreciation not otherwise covered, and damage caused by using the vehicle for racing are excluded.

7. Accident Claim Process

After an accident, the insured should take reasonable steps to prevent further damage, notify the insurer promptly, and avoid beginning major repairs before survey or authorization unless emergency action is necessary.

Common claim documents include the claim form, driving licence, registration certificate, repair estimate, photographs, and police report when applicable.
