

PolicyWise Policy Endorsement and Changes Guide

Document Code: PW-EN-2026-01

Synthetic-data notice: This fictional document is for RAG development, testing, demonstrations, and training only. It is not a real insurance contract.

1. What Is an Endorsement

An endorsement is an approved amendment to policy information or coverage that becomes part of the policy record.

2. Address Change

A policyholder may request an address change by providing the updated address and any required verification.

3. Nominee Change

For applicable life policies, nominee information may be changed by submitting the required nomination or endorsement request.

4. Vehicle Changes

Motor-policy changes such as registration details or certain vehicle information may require supporting registration documents and insurer approval.

5. Adding Family Members

Health-policy member additions are subject to the product's eligibility rules, permitted timing, underwriting requirements, and additional premium where applicable.

6. Effective Date

An endorsement is effective only from the approved effective date shown in the endorsement record. A request alone does not change coverage.

7. Premium Adjustment

A policy change may result in additional premium, refund, or no premium change depending on the endorsement.

8. Audit Trail

The system should retain the original policy details, requested change, approval status, effective date, and final endorsed values.

9. Testing Note

This guide is useful for questions about changing policy information rather than claim benefits.
